

# Puja Poudel

Graduate Data Engineer and Analyst

📞 0723652980 | ✉️ poudyalpuja99@gmail.com | 🌐 pujapoudyal | 📍 Stockholm

## Summary

A MSc graduate with a strong passion for data analytics and software development, demonstrating the ability to translate academic knowledge into practical solutions. Skilled in Python programming and database management, with hands-on experience creating visualizations that inform business decisions. Recognized for clear communication and effective leadership, and driven to apply data engineering expertise to support organizational growth and innovation.

- **Focus:** Data Analysis, ETL Processes, and Business Intelligence.
- **Approach:** Pragmatic, collaborative, and results-driven.
- Hands-on experience developing interactive dashboards in Power BI from academic and internship projects.
- Certified in Azure fundamentals with a keen interest in developing cloud-based data solutions.
- A collaborative team player focused on finding efficient solutions to complex data challenges.

## Experiences

### Biketrace AB

Internship

Stockholm, Sweden

2023

- Developed and implemented Python-based storefront and account systems, leading to an enhanced user experience for customers.
- Collaborated with the development team to design and deploy new website features, contributing to improved functionality and user engagement.
- Improved application performance by implementing database indexes and cache optimization, reducing page load times by over 1 second.
- Gained expertise in data engineering, machine learning, and web development.
- Expanded my professional network by collaborating with stakeholders.

### ACCENTURE

Virtual Internship

Online

2024

- Cleaned and modeled datasets to ensure accuracy and prepare them for detailed analysis.
- Created interactive visualizations to identify trends and presented data-driven insights to the client.

## Education

### Stockholm University

Master of Computer and System Sciences

Stockholm

2025

### Tribhuvan University

Bachelor of Computer Science and Information Technology (BSc. CSIT)

Kathmandu

2018

## Projects

### Real-Time Monitoring and Visualization of Earth's Temperature

- Built a pipeline for collecting and integrating temperature data from sources such as NASA EOS satellites and Berkeley Earth.
- Created interactive visualizations and dashboards using maps and charts to display and analyze the data.

## Technical Skills

### Data Concepts

Data Analysis, Data Warehousing, Data Pipelines, ETL, Data Governance, Data Architecture

### Cloud Platform

AWS, Microsoft Azure, Google Cloud Platform (GCP)

### Data Visualization

Power BI, Tableau, Looker, QuickSight

### Programming & Databases

Python, MySQL, PostgreSQL, Microsoft SQL Server, KQL

### Tools

Git, GitHub, Microsoft Fabric, Apache Spark, Excel, Snowflakes, Docker

### SoftSkills

Solution Oriented, Communication & Collaboration, Leadership, Innovative, focused, Rapid, Adaptive and Agile

## Certifications

[1] Microsoft Certified: Azure Fundamentals (AZ-900)

[2] Data Analytics Essentials by Cisco
